EDUCATION

2019- 2022

Kallam Haranadhareddy Institute Of Technology

- Bachelor Of Technology
- **Stream :   ECE**

SKILLS

- Core java
- Spring Boot
- Html
- Css
- Javascript
- Angular
- Rdbms

LANGUAGES

- English
- Telugu
- Hindi

PROFILE :

Aspiring Software Engineer with a solid backend development background, eager to apply academic knowledge and internship experience. Proficient in writing clear, concise code and keen on exploring new technologies. Skilled in effective collaboration within diverse teams, adaptable to remote or in-office environments. A complex problem-solver with an analytical mindset, committed to delivering impeccable code on tight schedules.

PROJECTS :

Java Console Based Banking System
https://github.com/Saik-45/My_Bank_Application_Core_Java

- Engineered a console-based banking application in Java, catering to both customer and administrative needs for a multi-faceted
- Implemented comprehensive features that enable secure and management of banking operations, customer service, and administrative tasks.
- Designed system architecture to support multi-user access and data integrity.

Database and QR Code Integration Specialist
Github Repository: https://github.com/Saik-45/qrCodeCrudOperations

- Developed a QR-enabled data storage and retrieval system, incorporating the generation of QR codes linked to unique
- Established robust database solutions for storing and efficiently retrieving data via code scans, enhancing user experience and operational efficiency.
- Spearheaded the integration of QR code technology with database management systems to streamline processes and improve data accessibility.

Spring Boot Banking System
https://github.com/Saik-45/My_Bank_Application_SpringBoot

- Crafted a secure, multi-user banking system using Spring Boot, focusing on differentiated functionalities tailored to customer
- Ensured the implementation of advanced security protocols to protect data and operations within the banking system. Coordinated with cross-functional teams to design user-friendly interfaces and ensure seamless integration of backend services with front-end platforms.
